DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Oath/Declaration

2. The oath lacks the statement of venue. Applicant is required to furnish either a new oath or declaration in proper form, identifying the application by application number and filing date, or a certificate by the officer before whom the original oath was taken stating that the oath was executed within the jurisdiction of the officer before whom the oath was taken when the oath was administered. The new oath or declaration must properly identify the application of which it is to form a part, preferably by application number and filing date in the body of the oath or declaration. See MPEP §§ 602.01 and 602.02. Two pages of Oath and Declarations are missing.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 are drawn to EL display, classified in class 345, subclass 76.
 - II. Claims 8-21 are drawn to EL display driven by TFT, classified in class 345, subclass 92.
 - III. Claims 22-35 are drawn to EL display driven by TFT and gray scale in class 345 subclass 77.

Art Unit: 2673

IV Claims 36-50 are drawn to EL display driven by TFT and Power Supply class 345 subclass 211.

V Claims 64-131 are drawn to EL display driven by TFT and gas discharge /erase/write class 345 subclass 66.

4. The inventions are distinct, each from other because:

Invention I relates a display unit; however, it does not relate to driving of display, gray scale, power supply, and gas discharge/erase/write;

Invention II relates driving of the display; however, it does not relate to gray scale, power supply, and gas discharge/erase/write;

Invention III relates to gray scale adjustment of the display; however, it does not relate to power supply, and gas discharge/erase/write;

Invention IV relates to display power supply; however, however, it does not relate to gray scale and gas discharge/erase/write and

Invention V relates gas discharge/erase/write to a display however, it does not relate to gray scale, and power supply.

5. These above mentioned reasons the inventions described and categorized by class

/subclass above are distinct. Search required for each class and subclass is independent.

Art Unit: 2673

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
